\*If the battery backup service option is not selected, no NBN-based services, including telephone and data services, will work in the event of a power failure or if the power is switched off at, or disconnected from, the power point. The Battery Backup powers the NTD in the event of power failure or disconnection to support some services using certain types of telephones/devices for a limited period of time (a total of approximately 5 hours under typical conditions) provided they use supported ports. You should ensure you have alternative means (such as a mobile phone) to place emergency calls. Medical and/or security alarms may also be affected. You should discuss your needs and solutions with your alarm provider. Please also consider the needs of anyone who lives/works at the service address when making a decision regarding the battery backup service. If you require a battery backup service in the future, an appointment to install the Power Supply with Battery Backup can be arranged with Node1 Internet. For more information regarding NBN Battery Backup Service and information regarding replacing and recycling batteries, please visit: <http://www.nbnco.com.au/connect-home-or-business/already-connected/nbn-equipment/battery-back-up-service-information.html>
