

## INFORMATION ABOUT THE SERVICE

### Description of the service

Node1 Internet's Fixed Wireless network is a high performance network servicing the areas of Geraldton and Perth, Western Australia. It covers all areas of Geraldton, with extensions to areas up to 100km from the Geraldton CBD (including the Abrolhos islands). The Perth network currently covers most areas north of the river and some areas in the hills. Fixed Wireless does not require a phone line, making it ideal for homes that struggle to receive an Internet connection through traditional means. Each connection requires a site survey prior to installation. This is done at no charge to you, and helps to ensure quality of service for all of our customers. Your Fixed Wireless connection will have a static IP address, high priority support, up to five email addresses and free Cisco IronPort spam filtering.

### Requirements & Availability

Availability depends on line of sight to Node1 Internet's transmitter towers. Once a site survey is complete you will be

advised whether or not you can get connected. Non-standard installations may require you to pay additional charges which you will be advised of prior to installation of the service. You will require a wireless router for this service. The monthly fee does not include the cost for a router however you may purchase one from us at an additional cost.

Internet speeds may be affected by loss of line of sight to transmitter tower, internet connectivity to your premises, wireless interference within and/or around your premises (if you are connecting wirelessly via a wireless router), limitations of network devices, mobile devices, consoles, computers, cables and other devices that you use, the available bandwidth of the service you are using (e.g. peer-to-peer games, websites & download sources) and other users on your Internet connection.

### Minimum Term

There is no minimum term for Fixed Wireless plans.

## INFORMATION ABOUT PRICING

### Monthly Charges

There are fifteen Fixed Wireless plans – consisting of three speeds and five quota options for each speed. Each plan has a standard monthly price and data allowance. The maximum monthly charge depends on whether you have chosen to use additional data via our data packs. The total minimum price is based on one month of plan charges, the standard installation fee and the standard antenna.

There are no automatic excess usage charges on the Fixed Wireless services – instead, traffic beyond the included data allowance will be shaped to 1mbps/1mbps. Quota is counted as the total of download. Uploads are unmetered. Usage is reset to the data allowance on the first day of each month. You may purchase data packs at an additional cost for a data allowance top up, if required. Information on data pack pricing is available at [http://node1.com.au/business\\_wireless.php](http://node1.com.au/business_wireless.php).

### Data Allowance Information

Data allowances are based on On-Peak + Off-Peak times. On-Peak: 8:00am to 12:00am and Off-Peak: 12:00am to 8:00am.

### Cancellation Fees

There are no cancellation fees on this service.
